

JXFM110

Lab Hammer Wheat Mill

Characteristics:

High speed, high efficiency, small crushing objects

Easy to operate, Built-in protection switch, safe use

Paste advanced wall cabinet sound insulation materials inside box, noise made less than similar products at home and abroad.

Has temperature device built in the motor, it will automatically shut down once the motor exceeds the set temperature, when temperature drops to the normal, it can restart.

Can be directly installed automatic feeder, which can effectively control the feed rate of high moisture samples and shell corn to improve the crushing effect.

Suitable for the gluten quantity and quality, grain viscosity, wheat falling number, near-infrared composition and other parameters

Technical parameters:

Power supply: AC220±10V 50Hz

Motor power: 750W

Workroom diameter: 110mm

Crusher hammers rotating speed: 16800r/min

Sieve plate aperture: 0.5, 0.8mm

Shape size: 51*31*41mm

Operating weight: 51kg
