G1030-C

Portable wheat analyzer

The portable wheat analyzer can be used for fast, non-destructive, and multi indicator quantitative detection and analysis in multiple stages such as wheat acquisition, storage, and processing, providing a fast detection method for wheat quality identification.

Main technical indexes of the instrument

Application field: wheat industry

Detection index: protein, moisture, wet gluten ,hardness(reference value)

Application scenarios: Acquisition, warehousing and processing

Scenarios: indoor and on-board detection

technical parameter

Test samples: wheat

Detection time: ≤90s

Weight: < 8kg

Spectral range: 680-1050nm

Detection method: grating transmission

Display screen: capacitive touch screen

Battery: detachable lithium battery

Product size: 210mmX293mmX228mm
